a. No new enhancement this release

2. Pharmacy Directory

a. No new enhancement this release

3. Formulary Directory

a. No new enhancement this release

Defect Fixes in this Release

1. Security updates and vulnerability fixes to portals

2. Provider Directory

a. Location resource when called responds as empty bundle. Removed the search parameter getpageoffset = 1 as it is not supported.
b. Practitioner Role resource Read operation when called was failing because the Specialty was set up as a required response attribute. It is supposed to be optional. Now fixed.
c. Practitioner Resource Read operation when requested using parameter _Id, value of attribute system is missing in response. Now fixed.
d. Organization Affiliation resource when called using Location parameter populated with invalid value would respond with a 404 (not found). Fixed now to respond with a 200 (ok) and empty bundle.
e. Provider Directory fixed getpagesoffset functionality as it was not working.

3. Pharmacy Directory

a. Insurance Plan Resource when requested using parameter Category Name populated with invalid value was responding with a 200 empty bundle. Code updated to now respond with a 400 (bad request).

Known Issues in this Release

1. Pharmacy Directory

a. DE650820: Duplicate resources listed in the error message returned
